## LOGLINE

*A punk-rock Army reservist in a dead-end Missouri town receives his deployment orders on the anniversary of his brother's combat death — and has to decide whether the country that killed his brother deserves to have him too.*

## THE FILM

The Reservist is about what we owe the things that have already taken everything from us. Eliot Howard is not a hero resisting service — he is a man trying to figure out if loyalty to a dead brother means following him or surviving him. The script opens in a soybean field and never lets you forget the specific gravity of a place that offers nothing that would admit to being opportunity under oath.
